

The PyxisCare Plan

Guiding you and your loved ones through today's complex health and wellness needs

PyxisCare's expert team of Nurse Client Advocates (NCA's) and care coordinators understand complex health care situations. The PyxisCare Plan provides a holistic evaluation of an individual's Medical, Environmental, Financial, Psycho-social and Legal needs, including the gathering and development of key documents as necessary. A caregiver can deliver the Plan, or a PyxisCare team can continue to support your loved one.

How We Can Help

- Evaluation and plan development for eldercare and aging in place.
- Plans to improve quality of life for individuals with challenges and disabilities at all ages and care levels.
- Develop roadmap for loved ones to self-manage caregiving and onsite support.
- Comprehensive whole-person approach prioritizes your questions and needs. Our nurses quickly evaluate and recommend next steps to wellness

What You Can Expect

Detailed plan outlines actions and next steps for client to enact with existing caregivers or with PyxisCare ongoing support. Plans are both proactive and interventional, depending on the care necessary to preserve wellbeing and improve quality of life.

Mom Caregiving for an Aging Parent: Laura's Story

For years, I've referred clients to Mindy Jones and her company, PyxisCare. They specialize in healthcare navigation and planning for serious illness, as well as preventative wellness. I'm an attorney and I first met Mindy through a referral from another professional advisor. I saw first-hand how she and PyxisCare brought great quality of care, as well as peace of mind, to our shared clients. Today, Mom is a different person.

PyxisCare Management

At PyxisCare, our priority is to provide you with the highest level of service and expertise to help you find the best healthcare solutions for your loved ones and yourself. We support you, so you can support them.

PyxisCare is here to improve quality of life by managing the highly complex and fragmented healthcare system for you. We offer trusted clinical expertise and integrated care coordination in multiple areas, including acute crisis management, ongoing maintenance of chronic illness or disabled loved ones, and proactive wellness planning. We're your partners in managing difficult healthcare challenges so you can make informed decisions with confidence – and be there when it matters most.

PyxisCare Management is based in Dallas/Fort Worth with offices throughout Texas and clients in several states.
